

Cyberkov Joins Anthropic's Cyber Verification Program

First Kuwaiti cybersecurity company verified for advanced defensive AI-assisted cyber research

Cyberkov has been accepted into Anthropic's Cyber Verification Program, becoming the first company in Kuwait to receive this designation. The program grants vetted cybersecurity organizations verified access to Claude's advanced dual-use cyber capabilities for legitimate defensive security research and operations.

Cyberkov continues to work with globally trusted technology and cybersecurity partners to deliver advanced, responsible, and resilient security capabilities for organizations facing evolving digital threats.
